READY TO USE ALL PURPOSE FILLER

1876 THE PROFESSIONAL RANGE

DESCRIPTION

Bartoline 1876 Ready To Use All Purpose Filler is high quality ready to use filler developed for the professional user. Its slump resistant formulation is ideal for repairs to plaster, plasterboard, brick, wood, stone, etc. Easy to use and sand down, dries white. Suitable for interior and exterior use and capable of taking wall plugs, nails and screws when set, 1876 The Professional Range Ready To Use All Purpose Filler is easy sanded and will not flash or grin when overcoated.

PREPARATION

Ensure surfaces to be filled are clean, dry and dust free. Hairline cracks should be slightly enlarged to ensure good filler penetration. Touch in nail and screw heads with oil-based paint to prevent rusting.

DIRECTIONS

If necessary, stir filler before use to an even, smooth consistency. Apply manually using a filling knife or trowel and press firmly into the cavity to be filled. Suitable for depths up to maximum 10mm. In large areas apply filler in layers no more than 10mm depth allowing each layer to set before applying the next. Fill slightly proud of surrounding surface and when fully set sand down to a fine finish. When used outdoor protect the filled area from rain and moisture until set. For best results, when set, protect the filler from excessive weathering with a suitable exterior paint or varnish.

CLEANING & STORAGE

After use, ensure lid is firmly replaced to prevent contents from drying. Remove excess filler from tools prior to cleaning. Clean tools with water before filler sets hard. PROTECT FROM FROST.

TECHNICAL DATA

Measurement	Value	Test Method
Physical State	Paste	Visual
Colour	White	Visual
Odour	PVA Type	N/A
Flash Point	N/A	N/A
VOC content	None	N/A
Viscosity	4000 - 4500	Lamy MSR4
