

TECHNICAL DATA SHEET

FAST ACTION PAINT & VARNISH STRIPPER

PAINT PREDATOR™

DESCRIPTION

Paint Predator™ Fast Action Paint & Varnish Stripper is specially formulated for rapid results and will quickly remove up to 3 layers of typical paint or varnish coatings in 30 minutes. Easy to apply and use, it is non-flammable, non-caustic and methylenechloride free, making it ideal for use in domestic households and is suitable for indoor and outdoor application.

COVERAGE

1 litre of Paint Predator™ Fast Action Paint & Varnish Stripper is sufficient to strip a surface area of approximately 1 square metre.

PREPARATION

Read label fully before use. Wear protective gloves. Protect floor coverings, textiles, and surfaces you do not want to come into contact with the stripper. Suitable for use on wood and masonry, and most metal substrates. Test a small, inconspicuous area of metals, plastics and other substrates to determine compatibility. Ensure surfaces to be stripped are dry. ENSURE THE CONTAINER IS SECURELY CLOSED AND SHAKE CONTAINER WELL BEFORE USE.

APPLICATION

Pour a quantity of Paint Predator™ Fast Action Paint & Varnish Stripper into a suitable container. Apply a generous, thick even coat by brush onto the surface to be stripped at a rate of 1 litre per square metre. Do not brush out. Leave until the stripper has softened the coating (minimum 30 minutes) and scrape-off using a shave-hook. Repeat the process if necessary*. Rub down the stripped area with a scrubbing brush. DO NOT USE WIRE WOOL. Wash down the stripped area with detergent and water. Rinse with clean water and allow to dry.

TECHNICAL DATA

| Measurement | Value | Test Method |
|----------------|--------------------------|-------------|
| Physical State | Liquid | Visual |
| Colour | Opaque White | Visual |
| Odour | Barely perceptible odour | N/A |
| pH | 4 - 4.5 | N/A |
| Density | 1 - 1.04 | N/A |

TECHNICAL

*Indicated number of paint/varnish layers removed are based on test conducted on actual painted surfaces with multiple coats of paint. Stripping times and results can vary subject to substrate condition, the number of coats and paint coating type. Bartoline Paint Predator Fast Action strips most solvent and water borne paint and varnishes including polyurethane varnishes and, if left applied, will typically continue working for 2-3 hours. If stripping areas with many, multiple paint layers use Paint Predator Heavy Duty. STORE IN A COOL, DRY PLACE. PROTECT FROM FROST. Dispose of any unused product and packaging responsibly in accordance with local and national regulations.
