## TECHNICAL DATA SHEET

# R/M EXTRA STRENGTH ALL PURPOSE FILLER

1876 THE PROFESSIONAL RANGE

### DESCRIPTION

Bartoline 1876 Ready Mixed Extra Strength All Purpose Filler is a high quality ready to use filler developed for the professional user. Its extra strong formulation is ideal for repairs to plaster, plasterboard, brick, blockwork and most other building materials. Suitable for interior and exterior use and capable of taking wallplugs, nails and screws when set. Bartoline Extra Strength All Purpose Filler is easily sanded and will not flash or grin when overcoated.

### PREPARATION

Ensure surfaces to be filled are clean, dry and dust free. Hairline cracks should be slightly enlarged to ensure good filler penetration. Touch in nail and screw heads with oil-based paint to prevent rusting.

### DIRECTIONS

If necessary, stir filler before use to an even, smooth consistency. Apply manually using a filling knife or trowel and press firmly into the cavity to be filled. Suitable for depths up to maximum 10mm. In larger areas apply filler in layers no more than 10mm depth allowing each layer to set before applying the next. Fill slightly proud of the surrounding area and when fully set, sand down to a fine finish. When used outdoor, protect the filled area from rain and moisture until set. For best results, when set, protect the filler from excessive weathering with a suitable exterior paint or varnish.

### CLEANING & STORAGE

After use, ensure lid is firmly replaced to prevent contents from drying. Remove excess filler from tools prior to cleaning. Clean tools with water before filler sets hard. PROTECT FROM FROST.

## TECHNICAL DATA

Measurement	Value	Test Method
Physical State	Paste	Visual
Colour	White / Off White	Visual
Odour	PVA Type	N/A
Flash Point	N/A	N/A
VOC content	None	N/A
Viscosity	4700 - 5300	Lamy MSR4
pH	8.5 - 9.5	N/A
