

TECHNICAL DATA SHEET

ROLLER RESCUE
BARTOLINE #SAVETHEBRUSH

DESCRIPTION

#SavetheBrush® Roller Rescue is a highly effective, water-based formulation designed to speed the cleaning of rollers and provides superior paint residue removal than traditional cleaning methods. The high-tech formulation of low VOC components is non-hazardous, virtually odourless, non-flammable and contains all biodegradable ingredients. #SavetheBrush® Roller Rescue can be used to clean all water-based, and most oil-based paints, including glosses, undercoats, primers and emulsions. It contains a conditioning agent that restores and retextures the roller sleeve, to a soft and supple condition. Not suitable for thinning oil-based paints.

DIRECTIONS

Remove as much paint as possible immediately after use, using a roller paint remover, piece of old newspaper or cardboard. Over a sink, bucket or wash basin, carefully pour #SavetheBrush® directly onto the roller sleeve and work in the solution thoroughly across all the roller surface with a gloved hand. Rinse the roller sleeve in clean water and agitate until as much paint as possible is removed. Repeat as necessary always using fresh #SavetheBrush®.

SENSIBLE PRECAUTIONS

If medical advice is needed, have product container or label at hand. Keep out of reach of children. Read carefully and follow all instructions. Safety data sheet available on request. Contains: Less than 5% non-ionic surfactants. Keep out of direct sunlight. To avoid spillage risk, always ensure the cap is secure and container is upright during transportation & storage.
